software documentation FROM: VSCS/4.2.2	software documentation FROM: Emails_Faa/Sat 03 Jan 98 15:59:00
4.2.2 Software Implementation - All VSCS software shall be developed in accordance with programming standards approved by the FAA. These standards shall include the use of modern structured programming techniques, unit and variable naming conventions, readability, and the use of descriptive comments.  All software documentation shall be in accordance with FAA-approved standards. All off-the-shelf software shall meet the documentation standards. Any waiver from the above requirements shall be justified and submitted to the FAA for approval.	Date: Sat, 03 Jan 1998 12:04:21 -0500 (EST) From: "Steve Smith" To: Janet Johnson Subject: Re: <u>software documentation cost</u> CC: Ron Rivers, Danielle Davidson  On Sat, 3 Jan 1998, Janet Johnson wrote: > I noticed since upgrading to 1.2.4 with RHP > 5.0 that customers are > using JJPL model instead of SSKP model. > Therefore, the <u>software documentation cost</u> > is not included in the estimate. > > My question: Should the <u>software</u> > <u>documentation cost</u> be part of this estimate?
